

Tehnici de baza in activitatea stiintifica
Techniques for Scientific Work (WS 2016-2017)
Homework 2 (due December 21, 2016)

1. For each symbol occurring in the following formula, specify whether it is a: logical quantifier, logical connective, predicate symbol, function symbol, variable, or constant.

$$\forall_f L[f, a] \iff \forall_{\varepsilon > 0} \exists_N \forall_{n \geq N} |f(n) - a| < \varepsilon$$

2. In the previous definition, L denotes the limit of a function, f denotes a real function of real argument, and a, ε, n, N denote real numbers. Formulate and prove the statement that if the limit of f is a and of g is b then the limit of $f + g$ is $a + b$.
